AMERICAN ZOOLOGIST

Volume 15, Number 4 Fall 1975

Statement of Ownership, Management and Circulation required by the Act of August 12, 1970; Section 3685, Title 39, United States Code; of

THE AMERICAN ZOOLOGIST

Published quarterly (February, May, August, November) by the American Society of Zoologists, Business Office, Box 2739, California Lutheran College, Thousand Oaks, California 91360. Managing Editor: Joseph T. Bagnara, Department of Cell and Developmental Biology, University of Arizona, Tucson, Arizona 85721.

Owned by the American Society of Zoologists (a non-profit organization). Known bond-holders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, and other securities: None.

The purpose, function, and non-profit status of this organization and the exempt status for Federal income tax purposes have not changed during the preceding 12 months.

Total no. copies printed, average no. copies each issue during preceding 12 months: 6000; single issue nearest to filing date: 6000. Paid circulation (a) sales through dealers and carriers, street vendors and counter sales, average no. copies each issue during preceding 12 months: 0; single issue nearest to filing date: 0. (b) Mail subscriptions, average no. copies each issue during preceding 12 months: 5275; single issue nearest to filing date: 5062. Total no. of copies distributed, average no. copies each issue during preceding 12 months: 5275; single issue nearest to filing date: 5062.

Joseph T. Bagnara, *Managing Editor*

AMERICAN ZOOLOGIST VOLUME 15

CONTENTS

No. 1 WINTER 1975

DEVELOPMENTAL IMMUNOLOGY

EDWIN L. COOPER	Preface	3
EDWIN L. COOPER AND LARRY WINGER	Transplantation immunity in annelids. III. Effects of temperature on xenograft rejection in earthworms	7
HARRIETTE C. SCHAPIRO	Immunity in decapod crustaceans	13
RICHARD K. WRIGHT AND EDWIN L. COOPER	Immunological maturation in the tunicate *Ciona intestinalis*	21
T. JUHANI LINNA, JOANNE FINSTAD, AND ROBERT A. GOOD	Cell proliferation in epithelial and lympho-hematopoietic tissues of cyclostomes	29
HOLLISTON B. RIVIERE, EDWIN L. COOPER, A. L. REDDY, AND WILLIAM H. HILDEMANN	In search of the hagfish thymus	39
JAMES B. TURPEN, E. PETER VOLPE, AND NICHOLAS COHEN	On the origin of thymic lymphocytes	51
MARGARET J. MANNING	The phylogeny of thymic dependence	63
JOHN D. HORTON AND TRUDY L. HORTON	Development of transplantation immunity and restoration experiments in the thymectomized amphibian	73
EDWIN L. COOPER, BRUCE A. BROWN AND RICHARD K. WRIGHT	New ideas on amphibian immunity: The lymph gland: A generator of both T and B cells	85
LAURENS N. RUBEN	Ontogeny, phylogeny, and cellular cooperation	93
STEVEN N. GOLDSTINE, V. MANICKAVEL AND NICHOLAS COHEN	Phylogeny of gut-associated lymphoid tissue	107
NICHOLAS COHEN	Phylogeny of lymphocyte structure and function	119
EDWARD J. MOTICKA	Development of immunological competence in chickens	135
B. J. BRYANT	Lymph node structure. An ontogenetic explanation for divergence in eutheria, metatheria, and prototheria	147

R. Ashman, D. Keast, N. F. Stanley and H. Waring — The immunological responses of marsupials 155

René J. Duquesnoy, Katherine Christensen, Grete M. Pedersen and Robert G. Kemp — Development of immunodeficiency of pituitary dwarf mice 167

Berenice Kindred and Francis Loor — The development of host type Θ and TL antigens in nude mice after transplantation of a neonatal thymus 175

David Boraker — Ontogenic studies of antigen binding cells in the dual thymus glands of the South American rodent, *Octodon degus* 181

Janet Decker and Eli Sercarz — Antigen binding cells and the generation of diversity 189

Julia M. Phillips-Quagliata — Suppressive effect of the thymus during neonatal tolerance induction in rats ... 199

Robert Auerbach — Development of immunity and the concept of stem cell tolerance 209

CONTENTS

No. 2 SPRING 1975

AMERICAN SOCIETY OF ZOOLOGISTS

Officers and Committees 225

Minutes 226
Financial Statement 229

FUNCTIONAL AND DEVELOPMENTAL ASPECTS OF HORMONE ACTION IN VITRO

Charles M. McGrath — Cell organization and responsiveness to hormones in vitro: Genesis of domes in mammary cell cultures 231

J. E. Varner and Yosef Ben-Tal — The role of membrane-bound enzymes in an early response of aleurone tissue to gibberellic acid 237

P. K. Sarkar and A. A. Moscona — Nuclear binding of hydrocortisone-receptors in the embryonic chick retina and its relationship to glutamine synthetase induction 241

Joel L. Ivey and Armen H. Tashjian, Jr. — Regulation of prolactin and growth hormone production by clonal strains of functional pituitary cells in culture 249

Katy Haffen — Sex differentiation of avian gonads in vitro 257

ANNA STEINBERGER — Studies on spermatogenesis and steroidogenesis in culture 273

FRANK TALAMANTES, JR. — In vitro demonstration of lactogenic activity in the mammalian placenta 279

JOSEPH A. CAMERON AND EVELYN M. RIVERA — Hormone-stimulated lipid synthesis in mammary culture 285

MODELS AND MECHANISMS OF MORPHOLOGICAL CHANGE IN EVOLUTION

S. N. SALTHE — Problems of macroevolution (molecular evolution, phenotype definition, and canalization) as seen from a hierarchical view point 295

PAUL F. A. MADERSON — Embryonic tissue interactions as the basis for morphological change in evolution 315

BRIAN K. HALL — Evolutionary consequences of skeletal differentiation 329

STEPHEN JAY GOULD — On the scaling of tooth size in mammals 351

JOHN W. WILSON III — Morphologic changes as a reflection of adaptive zone 363

EVERETT C. OLSON — Permo-carboniferous paleoecology and morphotypic series 371

JAMES W. VALENTINE — Adaptive strategy and the origin of grades and ground-plans 391

RICHARD J. WASSERSUG — The adaptive significance of the tadpole stage with comments on the maintenance of complex life cycles in anurans 405

R. MCNEILL ALEXANDER — Evolution of integrated design 419

KAREL F. LIEM AND J. W. M. OSSE — Biological versatility, evolution and food resource exploitation in African cichlid fishes 427

CARL GANS — Tetrapod limblessness: evolution and functional corollaries 455

T. H. FRAZZETTA — Pattern and instability in the evolving premaxilla of boine snakes 469

CONTENTS

No. 3 SUMMER 1975

DEVELOPMENTAL BIOLOGY OF THE ECHINODERMS

JEAN BRACHET — From chemical to molecular sea urchin embryology 485

SECTION I—GAMETOGENESIS AND FERTILIZATION

HARUO KANATANI	Maturation-inducing substances in asteroid and echinoid oocytes	493
DAVID EPEL	The program of and mechanisms of fertilization in the echinoderm egg	507
ROBERT G. SUMMERS, BONNIE L. HYLANDER, LAURA H. COLWIN, AND ARTHUR L. COLWIN	The functional anatomy of the echinoderm spermatozoon and its interaction with the egg at fertilization	523
FU-SHIANG CHIA, DAVID ATWOOD, AND BRUCE CRAWFORD	Comparative morphology of echinoderm sperm and possible phylogenetic implications	553

SECTION II—MORPHOGENESIS, DETERMINATION, AND DIFFERENTIATION

KAYO OKAZAKI	Spicule formation by isolated micromeres of the sea urchin embryo	567
MELVIN SPIEGEL AND EVELYN S. SPIEGEL	The reaggregation of dissociated embryonic sea urchin cells	583
H. TIMOURIAN AND G. WATCHMAKER	The sea urchin blastula: Extent of cellular determination	607
H. R. WHITELEY, S. MIZUNO, Y. R. LEE, AND A. H. WHITELEY	Transcripts of reiterated DNA sequences in the determination of blastomeres and early differentiation in echinoid larvae	629
JOSEPH BRYAN	Some factors involved in the control of microtubule assembly in sea urchins	649
RUDOLF A. RAFF	Regulation of microtubule synthesis and utilization during early embryonic development of the sea urchin	661

SECTION III—LARVAL BIOLOGY AND METAMORPHOSIS

RALPH T. HINEGARDNER	Morphology and genetics of sea urchin development	679
GORDON HENDLER	Adaptational significance of the patterns of ophiuroid development	691
RICHARD R. STRATHMANN	Larval feeding in echinoderms	717

SECTION IV—REGENERATION AND ADULT GROWTH

JOHN S. PEARSE AND VICKI B. PEARSE	Growth zones in the echinoid skeleton	731
THOMAS A. EBERT	Growth and mortality of post-larval echinoids	755

Abstracts 777
Index of Authors 833

CONTENTS

No. 4 FALL 1975

PRESIDENTIAL ADDRESSES—1974, 1975

JOHN A. MOORE — *Rana pipiens*—The changing paradigm 837

RICHARD M. EAKIN AND JEAN L. BRANDENBURGER — Understanding a snail's eye at a snail's pace ... 851

PROLACTIN IN THE LOWER VERTEBRATES

MARTIN P. SCHREIBMAN AND SEYMOUR HOLTZMAN — The histophysiology of the prolactin cell in non-mammalian vertebrates 867

CHARLES S. NICOLL — Radioimmunoassay and the radioreceptor assays for prolactin and growth hormone: A critical appraisal 881

ALBERT H. MEIER — Chronophysiology of prolactin in the lower vertebrates 905

MARTIN SAGE AND VICTOR L. DE VLAMING — Seasonal changes in prolactin physiology 917

JAMES NORMAN DENT — Integumentary effects of prolactin in the lower vertebrates 923

HOWARD A. BERN — Prolactin and osmoregulation 937

Index for Volume 15 951

INDEX TO VOLUME 15

This index covers only the major papers and their authors. It does not include the abstracts. For the latter, there is a separate index to the authors on pages 833-835. Minutes of business meetings, officers, and reports are entered only under American Society of Zoologists.

Abstracts, see note above
  index of authors, annual meeting, 833
  of papers given at annual meeting, 777
ALEXANDER, R. MCNEILL, Evolution of integrated design, 419
American Society of Zoologists,
  Committees, 225
  Divisional Officers, 226
  Financial Statement, 229
  Minutes of Annual Business Meeting, 226
  Officers for 1975, 225
American Zoologist,
  Directions for authors, cover 2
  Editorial Board, cover 2
  Statement of Ownership, xii
ASHMAN, R., D. KEAST, N. F. STANLEY, and H. WARING, The immunological responses of marsupials, 155
AUERBACH, ROBERT, Development of immunity and the concept of stem cell tolerance, 209
BERN, HOWARD A., Prolactin and osmoregulation, 937
BORAKER, DAVID, Ontogenic studies of antigen binding cells in the dual thymus glands of the South American rodent, *Octodon degus,* 181
BRACHET, JEAN, From chemical to molecular sea urchin embryology, 485
BRYAN, JOSEPH, Some factors involved in the control of microtubule assembly in sea urchins, 649
BRYANT, B. J., Lymph node structure. An ontogenetic explanation for divergence in eutheria, metatheria, and prototheria, 147
CAMERON, JOSEPH A., and EVELYN M. RIVERA, Hormone-stimulated lipid synthesis in mammary culture, 285
CHIA, FU-SHIANG, DAVID ATWOOD, and BRUCE CRAWFORD, Comparative morphology of echinoderm sperm and possible phylogenetic implications, 553
COHEN, NICHOLAS, Phylogeny of lymphocyte structure and function, 119
COOPER, EDWIN L., Preface to symposium on developmental immunology, 3
COOPER, EDWIN L., BRUCE A. BROWN, and RICHARD K. WRIGHT, New ideas on amphibian immunity: the lymph gland: a generator of both T and B cells, 85
COOPER, EDWIN L., and LARRY WINGER, Transplantation immunity in annelids. III. Effects of temperature on xenograft rejection in earthworms, 7
DECKER, JANET, and ELI SERCARZ, Antigen binding cells and the generation of diversity, 189
DENT, JAMES NORMAN, Integumentary effects of prolactin in the lower vertebrates, 923
Developmental biology of the echinoderms, 483-775
  adaptational significance of the patterns of ophiuroid development, 691
  fertilization in the echinoderm egg, program and mechanisms, 507
  gametogenesis and fertilization, 493-565
  growth and mortality of post-larval echinoids, 755
  growth zones in the echinoid skeleton, 731
  larval biology and metamorphosis, 679-730
  larval feeding in echinoderms, 717
  maturation-inducing substances in asteriod and echinoid oocytes, 493
  microtubule assembly in sea urchins, factors in control of, 649
  microtubule synthesis, regulation and utilization during early embryonic development of the sea urchin, 661
  morphogenesis, determination, and differentiation, 567-678
  morphology and genetics of sea urchin development, 679
  reaggregation of dissociated embryonic sea urchin cells, 583
  regeneration and adult growth, 731-775
  sea urchin blastula: extent of cellular determination, 607
  sea urchin embryology, from chemical to molecular, 485
  sperm, comparative morphology and possible phylogenetic implications, 553
  spermatozoon, functional anatomy and interaction with the egg at fertilization, 523
  spicule formation by isolated micromeres of the sea urchin embryo, 567
  transcripts of reiterated DNA sequences in the determination of blastomeres and early differentiation in echinoid larvae, 629
Developmental immunology, 1-213
  amphibian immunity, the lymph gland, a generator of both T and B cells, 85
  antigen binding cells and the generation of diversity, 189
  antigen binding cells, ontogenic studies in the dual thymus glands of the South American rodent, *Octodon degus,* 181
  cell proliferation in epithelial and lympho-hematopoietic tissues of cyclostomes, 29
  decapod crustaceans, immunity in, 13
  development of immunity and the concept of stem cell tolerance, 209
  gut-associated lymphoid tissue, phylogeny, 107
  hagfish thymus, in search of, 39
  host type θ and TL antigens in nude mice after transplantation of a neonatal thymus, 175

immunodeficiency, development in pituitary dwarf mice, 167
immunological competence, development in chickens, 135
immunological maturation in the tunicate *Ciona intestinalis*, 21
lymph node structure, an ontogenetic explanation for divergence in eutheria, metatheria, and prototheria, 147
lymphocyte structure, phylogeny and function, 119
marsupials, immunological responses, 155
ontogeny, phylogeny, and cellular cooperation, 93
preface, 3
thymic dependence, phylogeny, 63
thymic lymphocytes, origin, 51
thymus, suppressive effect during neonatal tolerance induction in rats, 199
transplantation immunity and restoration experiments in the thymectomized amphibian, 73
transplantation immunity in annelids, effects of temperature on xenograft rejection in earthworms, 7
DUQUESNOY, RENE J., KATHERINE CHRISTENSEN, GRETE M. PEDERSEN, and ROBERT G. KEMP, Development of immunodeficiency of pituitary dwarf mice, 167
EAKIN, RICHARD M., and JEAN L. BRANDENBURGER, Understanding a snail's eye at a snail's pace, 853
EBERT, THOMAS A., Growth and mortality of postlarval echinoids, 755
EPEL, DAVID, The program of and mechanisms of fertilization in the echinoderm egg, 507
FRAZZETTA, T. H., Pattern and instability in the evolving premaxilla of boine snakes, 469
Functional and developmental aspects of hormone action in vitro, 230-293
cell organization and responsiveness to hormones in vitro: genesis of domes in mammary cell cultures, 231
lactogenic activity in the mammalian placenta, in vitro demonstration, 279
lipid synthesis in mammary culture, hormone-stimulated, 285
membrane-bound enzymes in an early response of aleurone tissue to gibberellic acid, 237
nuclear binding of hydrocortisone-receptors in the embryonic chick retina and its relationship to glutamine synthetase induction, 241
prolactin and growth hormone production by clonal strains of functional pituitary cells in culture, regulation, 249
sex differentiation of avian gonads in vitro, 257
spermatogenesis and steroidogenesis in culture, 273
GANS, CARL, Tetrapod limblessness: evolution and functional corollaries, 455
GOLDSTINE, STEVEN N., V. MANICKAVEL, and NICHOLAS COHEN, Phylogeny of gut-associated lymphoid tissue, 107
GOULD, STEPHEN JAY, On the scaling of tooth size in mammals, 351
HAFFEN, KATY, Sex differentiation of avian gonads in vitro, 257
HALL, BRIAN K., Evolutionary consequences of skeletal differentiation, 329
HENDLER, GORDON, Adaptational significance of the patterns of ophiuroid development, 691
HINEGARDNER, RALPH T., Morphology and genetics of sea urchin development, 679
HORTON, JOHN D., and TRUDY L. HORTON, Development of transplantation immunity and restoration experiments in the thymectomized amphibian, 73
IVEY, JOEL L., and ARMEN H. TASHJIAN, JR., Regulation of prolactin and growth hormone production by clonal strains of functional pituitary cells in culture, 249
KANATANI, HARUO, Maturation-inducing substances in asteroid and echinoid oocytes, 493
KINDRED, BERENICE, and FRANCIS LOOR, The development of host-type θ and TL antigens in nude mice after transplantation of a neonatal thymus, 175
LIEM, KAREL F., and J. W. M. OSSE, Biological versatility, evolution and food resource exploitation in African cichlid fishes, 427
LINNA, R. JUHANI, JOANNE FINSTAD, and ROBERT A. GOOD, Cell proliferation in epithelial and lympho-hematopoietic tissues of cyclostomes, 29
MADERSON, PAUL F. A., Embryonic tissue interactions as the basis for morphological change in evolution, 315
MANNING, MARGARET J., The phylogeny of thymic dependence, 63
MCGRATH, CHARLES M., Cell organization and responsiveness to hormones in vitro: genesis of domes in mammary cell cultures, 231
MEIER, ALBERT H., Models and mechanisms of morphological change in evolution, 905
Models and mechanisms of morphological change in evolution, 294-481
adaptive significance of the tadpole stage with comments on the maintenance of complex life cycles in anurans, 405
adaptive strategy and the origin of grades and groundplans, 391
adaptive zone, morphologic changes as a reflection of, 363
biological versatility, evolution and food resource exploitation in African cichlid fishes, 427
embryonic tissue interactions as the basis for morphological change in evolution, 315
integrated design, evolution of, 419
macroevolution (molecular evolution, phenotype definition, and canalization) as seen from a hierarchical view point, 295
pattern and instability in the evolving premaxilla of boine snakes, 469
permo-carboniferous paleoecology and morphotypic series, 371
skeletal differentiation, evolutionary consequences, 329
tetrapod limblessness: evolution and functional corollaries, 455
tooth size in mammals, scaling, 351
